agriculture from extinction.

continuous internet connection to be successful

## 6. CUSTOMER CONSTRAINTS

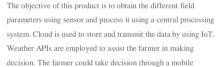

Deployment of huge number of sensors is difficult. It requires an unlimited or

### 5. AVAILABLE SOLUTIONS

The irrigation process is automated using IoT, weather data and field parameters were obtained and processed to automate the process of irrigation. The drawbacks are high cost of installation, efficient only for short distance, difficulty in storing the data.

#### 2. JOBS-TO-BE-DONE / PROBLEMS

#### 9. PROBLEM ROOT CAUSE

The frequent change or unpredictable weather and climate, made it difficult for the farmers to do agriculture. These factors play a major role in making decision whether to water the plant or not. The monitoring of the field is hard when the farmer is out of station, thus leading to crop damage.

### 7. BEHAVIOUR

Using proper drain system to overcome the effects of excess water due to heavy rain. Using hybrid varieties of crop that are resistant
